# TRAC⸬ - COMMUNICATION SOLUTION FOR ATM'S AND SERVICE TERMINALS

TRAC OFFERS A COMBINED HARDWARE AND SOFTWARE COMMUNICATION SOLUTION FOR ALL TYPES OF SERVICE TERMINALS, PACKAGED AS A NETWORK-AS-A-SERVICE.

ADMINISTRATIVE PORTAL
The portal allows monitoring of the transaction network and possibility to execute commands towards the terminal.

TRAC HARDWARE
The hardware is easily installed inside the terminal

BACKBONE NETWORK
The network consists of two sites with failover connection

ADDITIONAL VLAN OPTION
E.g. camera surveilance, alarm center.

SERVICE TERMINALS
All types of terminals handling payments or services, such as ATM's, kiosk's and vending - machines.

INTERNET
Encrypted and redundant connection through LAN/ADSL/fibre, mobile GPRS 3G & 4G.

TRANSACTION NETWORK
TRAC provides a secure and redundant connection from the terminal to the backbone and via a switch provider onwards to the acquiring bank.

ACQUIRING BANK
Bank and financial institutions such as American Express, MasterCard and VISA.

SWITCH PROVIDER
Authorisation Acquiring Services for purchase transactions and clearing/settlement.

TRAC is provided by VMI Systems and is part of VMI IT Services, established 1993.
